

**LINX**

## SWITCH BETWEEN CODES WITH EASE

### WHATEVER THE SUBSTRATE

Switch seamlessly between product runs; printing onto a range of substrates - from plastic to tin, glass to cardboard.

### SAVE TIME

Save time and meet production targets with quicker processes - by reducing the length of procedures, valuable time is saved when starting up and shutting down printers between shifts, and also when switching between codes for different product runs.

### WITH EASY-TO-USE MACHINES

Reduce errors and save staff time thanks to the Linx printers' intuitive user interfaces, which allow messages to be saved and are simple to use.
