

# Continuous Ink Jet

## industrial coders

Linx Continuous Ink Jet (CIJ) industrial coders can help you achieve your efficiency goals.

### Increased efficiency with Linx

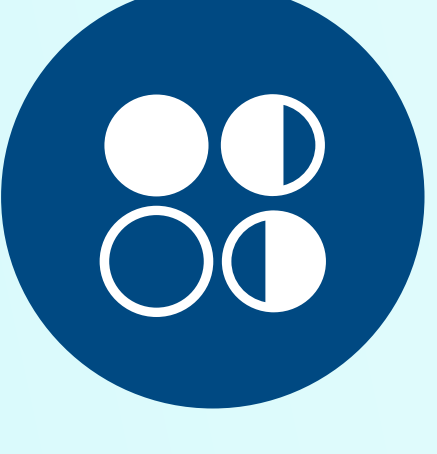

**Choice and selection**

**Ease of use**

**Problem solving**

#### Wide range

– Choosing the right printer for you means you won't be over subscribed and creating waste

#### Versatility

– Versatility of marking on a broad range of substrates

#### Inks

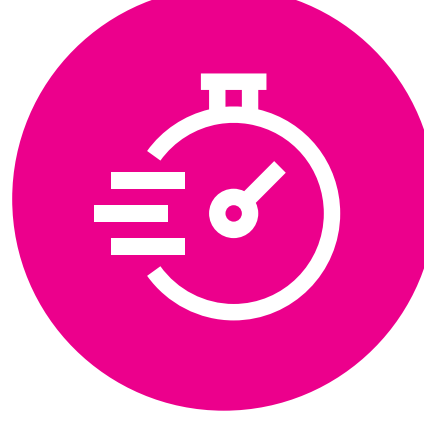

– Linx has a wide range of inks suited to fit your specific needs

### Choice and Selection

Select the right printer for your coding and marking needs

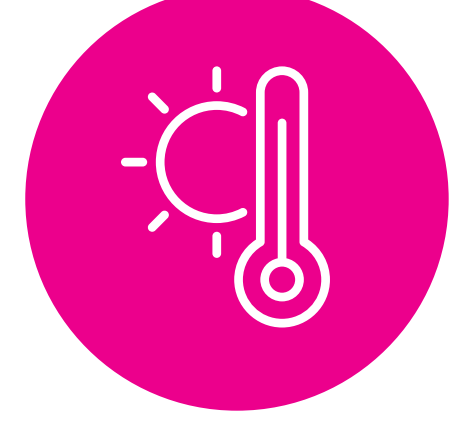

### Ease of use

Get jobs set up easily

#### Time saving change overs

- Quick job set up and change over
- Save time with simple message creation and message memory

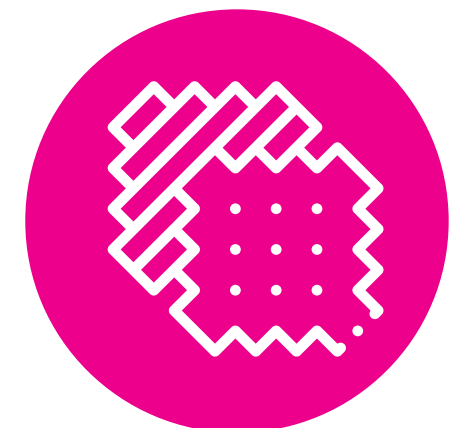

#### Automatic acclimatising

- Consistent high-quality print and coding due to the printer automatically acclimatising to changing environments and seasons

#### Real time production rates

- On-screen production rates with output and line stoppage logs mean you'll know when you can get your next job started more accurately
- Save time with changeovers and downtime

#### Adaptability

- Adaptability with primary and secondary packaging marking with one printer

### Problem solving

Effective maintenance and reliability

#### Alert diagnostics

- PrinterNet proactive notifications let you know when there are faults on the line
- Allows and supports faster fault resolution with remote diagnostics and onscreen help

#### Problem solving technology

- Self-service module for a quick, engineer-free service in around 30 minutes
- Up to 2 years between services
